

MILAN EXCHANGE

W. E. TURNER, J. G. HALL,
Editors and Publishers.

SATURDAY, MAY, 14, 1888.

In severing my connection with the *MILAN*, I experience a feeling of sadness scarcely to have been expected. Short as has been my sojourn in your midst, it has, nevertheless, been so tinged with pleasure that in after life it will be remembered as one of the "golden spots" of the days that are gone.

We believe and hope that this paper will be a grand success, and that its influence for good will be even as the dew of heaven upon the fields of Hermon.

In retiring, bidding adieu to the *EXCHANGE*, allow me to return my sincere thanks for the encouragement extended to us, and for continued and increasing manifestations of interest, and we trust your support and kind appreciation will be given to our associate and successor, and to them we wish the approvals of a good conscience, and honest esteem of their fellowmen. Very respectfully,

B. L. MURRELL.

In assuming the responsibilities of Editorial life, I have but a vague conception of its cares or hardships. I have, it is true, learned that all things are not worth their assumed value; that verisimilitude is no proof; but that integrity and strict attention to whatever vocation we may choose, are the passports to success.

Believing that honorable conduct upon all occasions is the best recommendation a gentleman can have, I shall strive to merit the esteem of all, by treating others as I wish to be treated.

To my brethren of the press, I shall be just and courteous, and strive, by all means that are honorable, to do away with the harsh asperities so common to the Editorial chair; but at the same time I shall expose the evil and the dishonorable, be the result what it may.

In conclusion, let me ask your consideration in any fault; attribute it not to the heart, but to the head, and inexperience. "View me not with a critic's eye," but in a spirit of charity. Show me my error, that I may turn from it.

Very respectfully,
J. G. HALL.

There seems nothing left to this country, but for its people to stand quietly by and witness the life and death "mill" between Garfield and Conkling. There is no prospect of a settlement until one or the other of these battles has gone forever to grass. The issue is a mortal one, politically, and it is impossible for both cocks to occupy the same roost.

The sentence of the Grand Duke Nicholas will have a sad effect in Russia. Nothing short of the wreck of the nation will follow. The Nikhists will not stop until they have murdered the new czar.

The executive committee of the National Greenback party, will meet in St. Louis the 7th of next month and devise methods of saving this great country.

A bill granting women the right to vote has been ordered a third reading by the New York House of Representatives.

Gov. Colquitt, of Georgia, is an avowed candidate for the U. S. Senate, to succeed Ben. Hill.

The Governor of New York has issued a proclamation forbidding lotteries.

A democratic state convention is called to meet in Jackson, Miss. August 3d.

Delaware's Peach Prospects Rain.

There is no longer hope entertained by the fruit-growers of Delaware of any profit from peaches in that State this season. Not in twenty-five years has there been a worse showing, and not only have the growers given up all hope of having a crop this season, but the belief is general among them that a great majority of the peach trees have been killed, while almost all the rest of them have been so injured as to make them useless. Many of the most enterprising growers are already making arrangements for planting new orchards to take the place of the trees which they believe to be dead or dying. Should the fear of growers prove correct that the peach orchards of the State have been practically destroyed, it will result in a serious loss, as no less than \$5,000,000 are invested in peach cultivation on the peninsula, more than half of which is invested in Delaware.

Tennessee News.

Two more Herdies have arrived in Nashville, and were placed on the Church, Spruce and Broad street line on Sunday, running out to Vanderbilt University.

Some of our farmers are experimenting on the Spring Russian wheat, and it is said, so far, it is proving a complete success. It looks much finer than any of the fall wheat. —Alamo Sentinel.

Laural Hill school house, near Mountzuma, was burned a few days since. It is thought to be the work of an incendiary on account of the four mile law. This is the second in six months. It is a pity the soundrels cannot be caught and punished. —Jackson Whig.

The Louisville and Nashville Railroad Company's gross earnings for the fourth week in April were \$260,000; for the same time last year, \$169,200; increase, \$91,400. The gross earnings from January 1st to April 30 were \$3,408,149, against in 1887 \$2,410,015; increase, \$998,134.

Col. Henry Blood, of New York City, purchased through the real estate agency of A. V. S. Lindsay and Son, the famous Payne farm, last Monday. This is said to be one of the finest farms in Middle Tennessee; it is situated in the suburbs of Nashville. He gave \$20,000 cash for the tract.

Charles E. H. Martin, Jr., was drowned near the lower island on Sunday afternoon. He was a good swimmer but went too far out in the stream, which was very much swollen, and was taken with cramp in one of his arms. A small negro boy saw him and unsuccessfully attempted to save him with a canoe. —Nashville American.

John Bath, nineteen years old, clerk for Theodore Wathall, railroad agent at Cherry Station, was run over by the north bound passenger train last Tuesday morning at that place, and his left foot and leg cut off. Dr. Beaumont, of this city, was sent for to assist in dressing his wounds. His condition is critical.

Last Monday night, between 10 and 11 o'clock, ex-Sheriff R. G. Harris' dining room and kitchen about one mile north of town, was completely destroyed by fire, together with their entire contents, and a wagon, a hack, harness and plow gear, a hen house and several chickens. —Alamo Sentinel.

Mr. R. T. Hoskins, of the 13th district, has a wonderful branch hen. On four different occasions she has dropped an egg as large as a goose egg. When opened they were found to contain a well-formed hen egg of the ordinary size. The larger or outer eggs contained a yolk, as did also the smaller. It was noticed that the shells of the outer egg were somewhat softer than those on the inside.

John Wilson, Superintendent of the zinc mines at Mossy creek was horribly killed last Wednesday. He was stooping over a small opening in a pit where some blasting had been done, when a rock weighing five tons came sliding down the excavation crushing him to death instantly. Strange to say, the skin of his body was nowhere broken, but his chest was full of blood. He was a brother of Mat. Wilson, Manager of the Atkin House, Knoxville. —Clarksville Chronicle.

Last Tuesday morning at 3 o'clock, in Chattanooga, two policemen, B. Chartz and Andy Thompson, col. shot and instantly killed Albert Sewall. He was shot in the back below the left shoulder blade, and the bullet was cut out of the right breast. Five shots were fired. The deceased was unarmed and running away. No warrant for his arrest had been issued at the time, but he was only a little noisy. The parties who witnessed the affair, say it was a cold blooded murder.

Last Tuesday afternoon, at 4 o'clock, William Simms, formerly employed as a druggist, went to father William Walsh, who resides in the parsonage adjoining St. Bridget's church, corner of 3d, and Overton streets, related a story of trouble, existing between himself and wife. Father Walsh listened patiently, and as Simms was laboring under great mental excitement, told him to lie down on a sofa in his study and that he would go to his wife and arrange matters between them. Simms complied, and father Walsh, after locking the door to prevent him being disturbed, went and saw Mrs. Simms. Returning an hour afterwards, Father Walsh was horrified at finding Simms lying dead on the floor, with his throat cut from ear to ear. The deceased was a confirmed morphine eater, and was under the influence of the drug when committing the act. —Nashville American. Special from Memphis.

Tennessee Crops.

The crop report of Commissioner A. W. Hawkins, of the Bureau of Agriculture, Statistics and Mines, for April, will show that there is a decrease in the acreage of tobacco of nearly ten per cent. Cotton has apparently increased, but not really. This is caused by the fact

that in 1887 it was planted on four or five counties, last year, tried cotton as a money crop, still holding on to their grains and grasses, and succeeded so well that the area has, this year, been increased two, three and four fold. Thus the percentage in those counties makes an apparent increase all over the State, while their actual acreage is insignificant in comparison with that of the regular cotton counties. The acreage of wheat has diminished owing to the severe weather last fall preparation of the ground and sowing. Its condition, however, is very good and there is prospect of a good crop. The acreage of clover and the grasses has largely increased, and the condition of the crops far above the average. Sorghum acreage has considerably decreased. In the fruits their is good prospect for a large apple crop, and there are many sections where the peaches are not at all hurt.

The severe winter all over the State has caused the general condition of stock to be poor, especially in the case with milch cows and other cattle which are allowed to go at large, exposed to the weather. The average of damage from want of shelter for this stock may safely be put at 24 per cent. of its value, and it will be far in the summer before the standard of average quality of last fall is reached. There is a lack of work oxen. Hogs are reported as scarce on account of the large sales last fall and winter killing a large number of last fall's pigs. —Nashville American.

How to Make Tennessee Prosper.

Maj. Wm. J. Sykes thus closes a letter to the Memphis Appeal: "The only thing that can now be done is to devise ways and means to reduce the debt and to make it less burdensome to the people. The improvement of the country, the erection of furnaces and factories, the opening of coal mines and ore banks, making navigable our rivers, the proper regulation of railroads, the wise management of our penitentiary, the making of good public roads, the reform in our judiciary system—these will do more for the State than the constant agitation of the State debt question, which has absorbed everything else and prevented such wise and wholesome legislation as would have saved the State far more than the whole amount of the debt tax. Let there hereafter be no divisions among us; let the words 'high tax' and 'low tax' and 'State credit' and 'repudiation' be obliterated from the vocabulary of Tennessee politics; let us unite upon practical, live measures and put our State upon the onward and upward march of progress and improvement."

If you want wood and metallic cutlins and caskets call on J. W. Younger, for he has the finest and cheapest in Milan. Shop on Main street near the bridge.
